

AUS Manufacturing Company

Partial Equipment List:

Mazak CNC VTC - 16B
 Mazak CNC QT - 18N
 Mazak CNC QT - 20HP
 Lagun VTV - 2 Mill with Accessories
 Lagun VTV - 2 Mill with Accessories
 Summit Lathe - 14" X 40
 Summit Lathe - 20" 4 X 80
 Millermatic 250 X
 Millermatic 250 X
 Miller Syncrowave 250
 Miller Thunderbolt XL
 Miller Dialarc 250 AC/DC
 Miller Dialarc 250 AC/DC
 Atlas Welding Positioner Table AT - 200
 ESAB PT - 31 XL Plasma Torch
 Kerf Oven K450
 Spitfire Lapping Machine SP - F888 - 24
 Kent Surface Grinder SGS 1020 - AHD
 Marvel Band Saw Series 8 Mark 2
 Roller Units for Marvel Band Saw
 Wilton Band Saw 5680001A
 Trinco Dry Blast Cabinet 48/11 with Vac.
 Wilton Sander 4202A
 Clark Forklift with Charger
 KK Calamar Grinder
 2 - 10HP Champion Air Compressors with Dryer
 2 - Baldor Grinders NP - 0234
 Carolina Industrial Press 55 Ton CBP5500
 Carolina Adjustment Band Saw BS 925
 Carolina Drill Press 16 Speed ZJ4116BH

Also have a large assortment of support equipment

AUS

Manufacturing Company

AUS Manufacturing Company is your one stop shop for precision machining and fabrication.

Our in house capabilities start with CNC machining both in milling and turning. We have some of the latest conversational controls in order to expedite machining programs in a competitive manner. Sizes on these processes are: Turning 14" X 36" ...Milling 18" X 40".

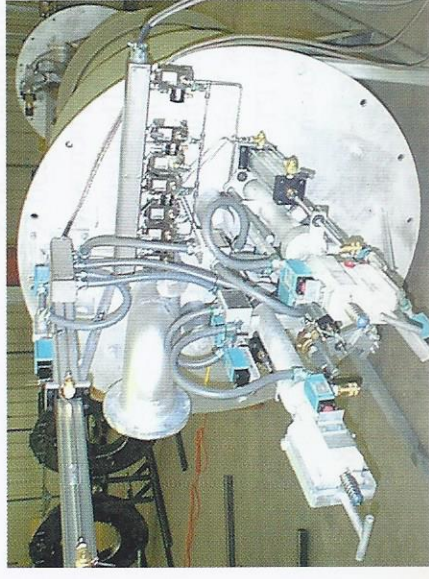

We have a host of manual support equipment both in milling and turning. We can machine larger work (24" X 72") in our lathes. Some of our support equipment enables us to do high precision work in areas like surface grinding and lapping of sealing surfaces.

Fabrication work is a strong point here at AUS. We have a minimum of 4 welders on staff with up to date certification in ASTM Sec.9, B31 requirements standards. Some of our specialties include carbon and stainless piping for ammonia injection and burner systems.

We naturally have specialty work that centers around complete burners and miscellaneous needs around power generating stations. Our main customer base is a host of power utility plants in the United States and over seas. Due to having a facility with a general capability, we build parts for customers in a variety of areas from naval defense parts, aircraft parts, fabrication of window embeds, roof hatches for foreign embassies, and new and replacement parts for industrial finish mowers and amusement park rides.

AUS has all documentation needed with any job requirement...certificates of conformance, material certificates, inspection reports, outside process (heat treat/plating) certificates.
